

1964 Chevrolet Malibu

In the Fall of 2019, I bought this 1964 Chevelle Malibu. The body looked as good as it does now. However, I told the guy I bought it from I never saw a car look so good and sound so bad in my life.

In rebuilding the engine, I gave George Beavis machine shop in Vallejo my 283c.i. block and heads. He kept it for at least nine months. That would not be bad, but he put too long of push rods in. The engine only ran for about 10 minutes before it broke two

rocker arms and dented and put a hole in my valve covers. He would not help me out at all.

LT's speed and machine shop in Napa did a good job of repairing my engine.

I had a hard time getting a good stock carburetor, buying rebuilt carburetors did not work for me. I ended up sending my carburetor to Carburetor Express in El Monte. The did a good job rebuilding my carburetor.

I am very pleased with the car now. The interior is original like new.
