

1967 Chevy C10 - 400 small block - 700R Trans

This was at one time one of my dad's work trucks. It was put together and painted in the barn 25 years ago. Have upgraded almost everything over the years – wiring, bed, brakes, gas tank, etc. When I joined the BOYZ I knew I had to step up a bit so color sanded the paint to get a much better flat finish. Interior is next on the list. Keep on Cruizin!!!!
